

"You don't own this game" Error.

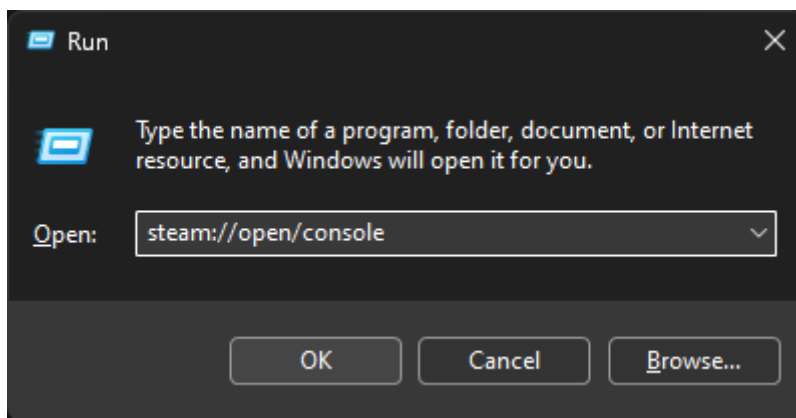

If you are unable to download a mod or tool from this website, even after making your Steam Profile public.

Try the following:

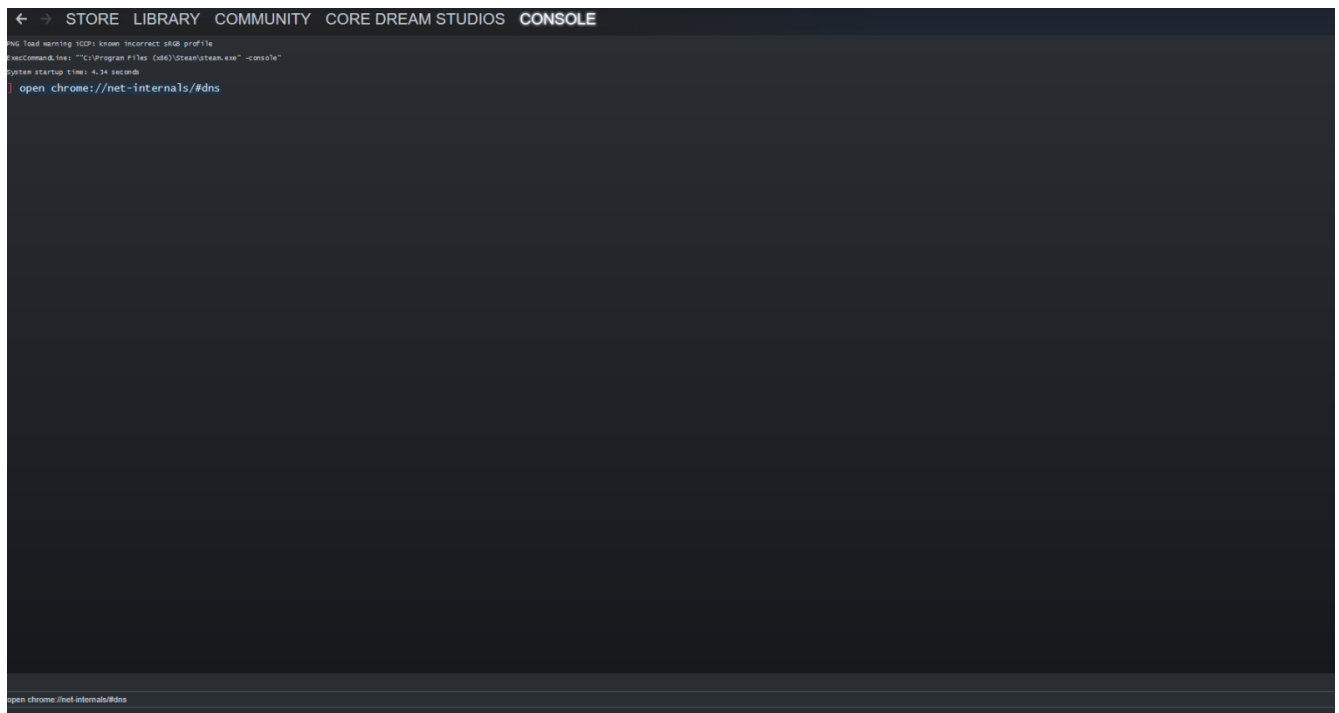

1. Hold the **[WIN]** key, and press **[R]** to bring up the Run box.

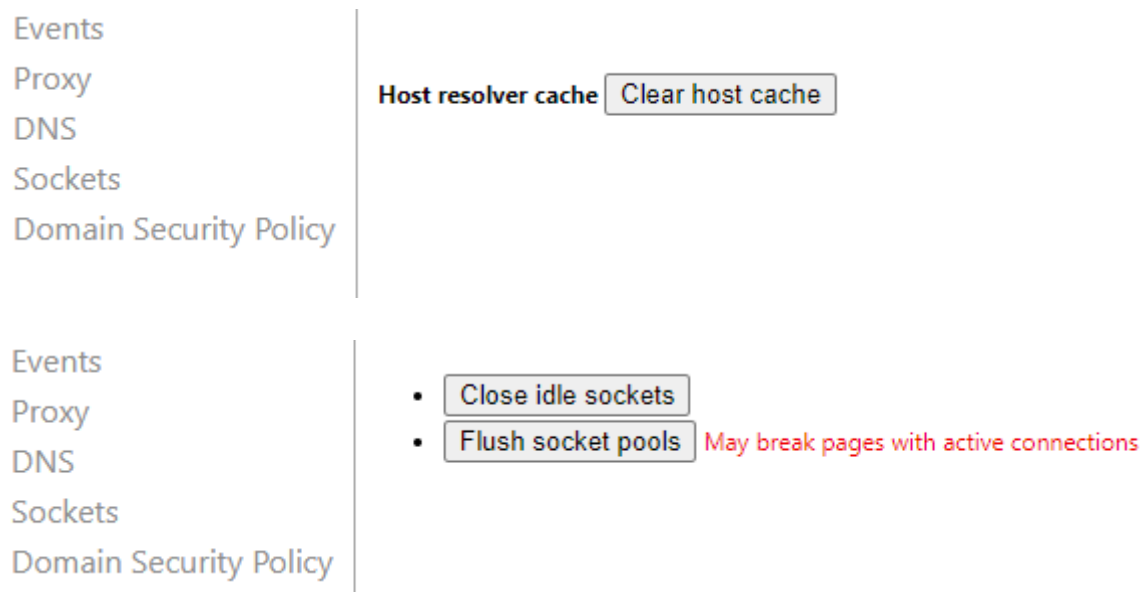

2. Type ***steam://open/console*** and click [**OK**]

3. Click the **Console** tab in Steam and type ***open chrome://net-internals/#dns*** and press **[Enter]**

4. Click **[Clear Host Cache]** and if you want, click **Sockets** and click **[Flush Socket Pools]**

Finally, go back to the PWM website, click **Account** then **Dashboard**, scroll down to the bottom, then click the big green button marked **Sync Profile**.
